

KLOGS® are meant to have a slightly looser fit than most other footwear. It is normal when wearing **KLOGS®** to feel your heel lifting up and down with every step.

Polyurethane Sizing – **KLOGS®** does not offer half sizing in our polyurethane styles. Therefore, if you wear a half size, you should consider sizing up. Please see **KLOGS®** Fit Chart for [Men](#) and [Women](#) individual style and gender fitting. **KLOGS®** polyurethane does not stretch over time. The way your polyurethane klog fits the day you purchase it will be the way it fits over the life of the product.

Leather Sizing – **KLOGS®** offers whole & half sizes in many of our Leather styles. Please see **KLOGS®** Fit Chart for [Men](#) and [Women](#) individual style and gender fitting. It is normal for leather **KLOGS®** to experience some stretch in the upper material, but the way the product feels under foot will remain the same for the life of the product.
